STYLE LAZ	B4/2/8	B4/2/12	B4/2/16	B4/1/8	B4/1/12	B4/1/16	

### COLOUR FINISHES

Standard finishes for the translucent screens include our natural lacquer or coloured lacquers of light oak, orign pine or cherry red. Alternatively the frames may be finished in a solid paint colour (illustrated in black finish), or in a stain wash colour, which adds colour to the timber but permits the timber grain to be seen.

To assist ensuring that the correct amount of natural light can penetrate the diffuser to poorly lit areas, two diffusers are available. One is white with a 26% light block. The other is smoked brown with a 10% light block. Fabric colour options are illustrated below, which are velcro compatible, ideal for attaching reminders or notices.

### FABRIC COLOUR OPTIONS

Screen Plus have increased the options available with their translucent range with a choice of free standing, linked or floor fixed screens. A range of heights are available and the proportion of translucent to solid panel may be varied.

The timber frame and double sided trellis is constructed from selected knot and defect free timber, with a choice of pine, beech or ash.
